

## Activity 2: Server room design

### Element 3 Session 3.8

Name: \_\_\_\_\_

#### Task.

You must design the security measures that will be implemented from an access control perspective. This should be designed visually and can be fed back to the class.

#### Brief.

A large organisation in the Midlands has a server room which needs security measures implementing.

Server room current information:

- one door which leads to a main corridor within the building
- one window which leads out to the second floor
- currently, there are no locks on the main door
- no permissions in place
- no access controls set up
- no authentication set up
- two technicians only require access to the server room

#### Notes.

# Activity 2: Server room design

## Element 3 Session 3.8

Name: \_\_\_\_\_

### Extension

Explain your reasons and justifications behind the decisions you've made.
